ELSEVIER

Journal of Membrane Science 100 (1995) 297–298

journal of MEMBRANE SCIENCE

Contents

***Special Issue**: The Early History of Membrane Science. Selected papers celebrating Vol. 100*

Preface vii

Investigations on the causes for the ebullition of liquids
J.A.(Abbé) Nollet (Paris, France) 1
New observations on endosmosis and exosmosis, and on the cause of this dual phenomenon
R.J.H. Dutrochet (Château-Renault, France) 5
Notice of the singular inflation of a bladder
T. Graham (Glasgow, United Kingdom) 9
On the penetrativeness of fluids
J.K. Mitchell (Philadelphia, PA, USA) 11
On the law of the diffusion of gases
T. Graham (Glasgow, United Kingdom) 17
The laws of molecular flow and of inner friction flow of gases through tubes
M. Knudsen (Copenhagen, Denmark) 23
On the absorption and dialytic separation of gases by colloid septa Part I.—Action of a septum of caoutchouc
T. Graham (London, United Kingdom) 27
On liquid diffusion
A. Fick (Zürich, Switzerland) 33
The role of osmotic pressure in the analogy between solutions and gases
J.H. van't Hoff (Amsterdam, Netherlands) 39
Theory of membrane equilibria and membrane potentials in the presence of non-dialyzing electrolytes. A contribution to physical-chemical physiology
F.G. Donnan (Liverpool, United Kingdom) 45
Collodion membranes
S.L. Bigelow and A. Gemberling (Ann Arbor, MI, USA) 57
Pervaporation, perstillation and percrystallization
P.A. Kober (Albany, NY, USA) 61

Commentary: Tracing Membrane Science
K.W. Böddeker (Geesthacht, Germany) 65

Analysis of permeation rate of cobalt ions across a supported liquid membrane containing HEH(EHP)
I.J. Youn, Y. Lee (Taejon, South Korea) and W.H. Lee (Seoul, 121-742., South Korea) 69
AC impedance of the bipolar membrane at low and high frequencies
T.C. Chilcott, H.G.L. Coster and E.P. George (Sydney, Australia) 77
Protein extractions by supported liquid membrane with reversed micelles as carriers
S.-W. Tsai, C.-L. Wen, J.-L. Chen and C.-S. Wu (Tainan, Taiwan) 87
Facilitated transport of ions through fixed-site carrier membranes derived from hybrid organic-inorganic materials
P. Lacan, C. Guizard (Montpellier, France), P. Le Gall, D. Wettling (Chalon-sur-Saône, France) and L. Cot (Montpellier, France) 99
Mathematical modelling of permeate flow in multichannel ceramic membrane
P. Doleček (Pardubice, Czech Republic) 111
Enhancement of plasma filtration using the concept of the vortex wave
H.R. Millward, B.J. Bellhouse, I.J. Sobey and R.W.H. Lewis (Oxford, UK) 121
Comparison of potentiometric enzyme sensors for urea and penicillin-G: differential thick-film sensors versus classical electrodes
C. Eppelsheim, R. Aubeck and N. Hampp (München, Germany) 131

0376-7388/95/$09.50 © 1995 Elsevier Science B.V. All rights reserved
SSDI 0376-7388(95)9999-Z

Turbulent transport in membrane modules by CFD simulation in two dimensions
E. Pellerin, E. Michelitsch (Lille, France), K. Darcovich, S. Lin and C.M. Tam (Ottawa, Ontario, Canada) 139
Study of membrane compaction and its influence on ultrafiltration water permeability
K.M. Persson, V. Gekas and G. Trägårdh (Lund, Sweden) 155
Recovery of nickel from a simulated electroplating rinse solution by solvent extraction and liquid surfactant membrane
R.-S. Juang and J.-D. Jiang (Taoyuan, Taiwan) 163
Photopolymerization and characterization of methacrylate-based reactive composite membranes
B. Glad, K. Irgum and P. Hörstedt (Umeå, Sweden) 171

Meetings calendar 181

Study on the effect of spinning conditions and surface treatment on the geometry and performance of polymeric hollow-fibre membranes
S. Mok, D.J. Worsfold, A.E. Fouda, T. Matsuura (Ottawa, ON, Canada), S. Wang and K. Chan (Gloucester, ON, Canada) 183
Economic feasibility study of polyelectrolyte-enhanced ultrafiltration (PEUF) for water softening
A. Tabatabai, J.F. Scamehorn and S.D. Christian (Norman, OK, USA) 193
The desalination of a mixed solution of an amino acid and an inorganic salt by means of electrodialysis with charge-mosaic membranes
K. Sato (Ichinoseki, Japan), T. Sakairi, T. Yonemoto and T. Tadaki (Sendai, Japan) 209
Preparation of ultrafiltration membranes of HCEC and CTA blend, and studies of resistance to microbiological degradation and other properties
G. Qunhui, H. Ohya (Yokohama, Japan), Y. Xuejing, C. Liankai and H. Jicai (Guangzhou, China) 217
Interaction between anionic polyelectrolytes and anion exchange membranes and change in membrane properties
T. Sata, T. Yamaguchi and K. Matsusaki (Tokiwadai Yamaguchi Prefecture, Japan) 229
Electrochemically controlled transport of small charged organic molecules across conducting polymer membranes
A. Mirmohseni, W.E. Price and G.G. Wallace (Wollongong, NSW, Australia) 239
The use of bacteria immobilized in tubular membrane reactors for heavy metal recovery and degradation of chlorinated aromatics
L. Diels, S.V. Roy, K. Somers, I. Willems, W. Doyen, M. Mergeay, D. Springael and R. Leysen (Mol, Belgium) 249
Critical flux concept for microfiltration fouling
R.W. Field, D. Wu, J.A. Howell (Bath, UK) and B.B. Gupta (Compiègne, France) 259
Self-diffusion of water–ethanol mixtures in polyacrylic acid–polysulfone composite membranes obtained by pulsed-field gradient nuclear magnetic resonance spectroscopy
V.I. Volkov, S.A. Korotchkova (Moscow, Russia), H. Ohya and Q. Guo (Yokohama, Japan) 273
